Enhancing Business Intelligence: Analytics Support Implementation

- Transform your manufacturing operations with Ishtrasha. We help businesses unify data across multiple systems, improve reporting visibility, and enable real-time analytics for faster decision-making. Our tailored solutions streamline operations, improve productivity, and support smarter supply chain and inventory management.

01

Client Overview

The HVAC multinational company, spanning across 150 countries.

02

Business Challenge

The customer faced challenges in managing large volumes of data from multiple sources and ERPs. They needed a unified analytics solution to improve real-time decision-making, streamline reporting, ensure data integrity, and reduce operational costs while overcoming issues related to time zones, accessibility, and multi-ERP expertise.

03

Ishtasha Solution

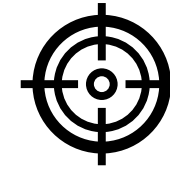

Ishtasha maps complex customer processes across business units before centralizing reporting. We enable smooth collaboration across languages and teams while providing real-time data insights that help businesses make faster, smarter decisions and improve operational efficiency.

04

Results

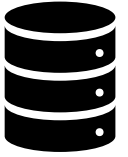

Achieved significant operational improvements through customized dashboards and analytics solutions. SLA compliance increased from 85% to 95%, while average response time reduced from 24 hours to 12 hours. Employee productivity improved from 80% to 90%, supported by 98% data accuracy and a 20% increase in data completeness. The solution also reduced excess inventory by 20%, lowered stockouts by 15%, and decreased forecast errors by 25%.
